

# Motor Flush

Safe for engine

Effectively removes slime, residue and sludge

- penetrates quickly into hard-to-reach engine places
- clears oil channels and washes sludge from piston rings
- effectively removes slime, residue and sludge
- safe for rubber seals and all engine components
- suitable for gasoline and diesel engines

## Instructions for use:

Use just before changing the oil. Check the oil level, warm up the engine. Turn off the engine, pour motor flush into the oil pan. Start the engine and let it idle for about 5 minutes. Do not increase the engine speed by pressing the accelerator or by a short drive. Switch off the engine, drain the used oil, close the oil drain, change the oil filter and pour new oil.
