

Black Arrow Anti crystal additive for AdBlue

Anti-crystalization
Protects & cleans SCR system

- prevents the formation and dissolves already formed urea crystals in the SCR system
- unblocks clogged injectors and urea dosing systems
- prevents corrosion of the exhaust system and extends its lifetime
- used regularly, increases SCR circuit efficiency in cold and heat

Instruction for use: Designed for diesel engine cars with selective catalytic reduction (SCR) technology. Do not pour to the fuel tank. Recommended dosage: use 25 ml of additive per 12 liters of AdBlue. Pour the additive into a special AdBlue tank and then top up with the appropriate amount of AdBlue.

250ml bottle is enough for 120L of AdBlue.

Capacity: **250 ml**
20 pcs. in box
